User journey

by the Design Team of Accenture Interactive NL

People 2–9

Time 30 min

Difficulty Beginner

Creating a user journey is a quick way to help you and your team gain a deeper understanding of who you're designing for, aka the stakeholder in your project. The information you add here should be representative of the observations and research you've done about your users.

1 Phases High-level steps your user needs to accomplish from start to finish	Installation	Login process	Connect the bank account and verification.	Tracking of expenses.
2 Steps Detailed actions your user has to perform	Checking the availability of network connection. Look off the storage availability. Downloading app in any app store	Login using name,password,mail or phone number that given in bank Need to use correct OTP that received Verification of OTP.	To give correct account details(account number) Needs to accept terms and privacy policies. account will start to connect.	User details will get checked According to expenses computation will occur User can give feedback .
3 Feelings What your user might be thinking and feeling at the moment	feels excited about what will be the app do	feels good when OTP receives earlier.	Feels free when account get connected	Feels secure when using application
	Get tensed when storage is full.	Get irritated when OTP not received.	Feels insecure about bank account privacy.	Nervous when app is not worked correctly
4 Pain points Problems your user runs into	Nervous Incase any Internet error occured to install the app.	Forget to add the daily expenses.	Security problems may occur on bank details.	Chances of each and every detail of expenses will hacked by third party.
5 Opportunities Potential improvements or enhancements to the experience	Use wifi for install the app.	Remember phone number that given in bank or use passbook for details.	To allow acccess to know transtraction.	Allowing the app to access the SMS it take details of spends automatically.
